Vibriosis (non-cholera Vibrio species infections)	0	0	2	0	0	0	0	0	1	0	0	0	0	0	0	0	3

This includes investigations initiated during Quarter 1, MMWR Year 2020 (December 29, 2019 through March 30, 2020). Only investigations with a case status are included in this report. For all outbreak conditions confirmed, probable, and suspect case statuses are included. For non-outbreak conditions confirmed and probable case statuses are included. If a condition is not listed that means no cases met the case definition during this time.

*Outbreaks that are part of a national cluster are classified as out of state. If the total number does not match the county breakdown, the remaining outbreaks are out of state.

**Lyme disease surveillance is a passive system and can take several months for cases to be counted. These numbers may change dramatically as providers return case report forms and the system is updated.
